

## Air Source Heat Pumps- Design and Selection And Challenges with Low Loads

Thursday May 16 from 12 PM to 1 PM

Presented by  
**Li Ling Young**  
Lead Engineering Consultant  
VEIC - Efficiency Vermont

We may think the important piece would be designing for efficiency. But before you get there it helps to know a bit about how heat pumps work and how building design load factors into design. We'll learn also about the NEEP cold climate heat pump list advanced selection tool to be used as a starting point for talking about good design with focus on the challenges with low loads.

Hosted by VT Passive House
